

## TuffWrap<sup>®</sup> Installations Projects AUTOMOTIVE

### TuffWrap<sup>®</sup> EXT Keeps Tire Manufacturing Facility Rolling

#### OVERVIEW

A Tire Manufacture expanded its production facility and needed protection against dust, debris and weather. It was essential to keep employees safe and the facility operational during construction.

#### CHALLENGE

The remodeling of Tire Manufacturer's facility included demolishing one of the existing walls, which would produce dust and debris and expose the facility to outside elements. While working on the area, the adjacent production lines needed protection from contamination. The temporary solution needed to be durable enough to withstand daily vehicle traffic. In addition, the employees required a clean and safe environment to continue working during construction.

#### SOLUTION

TuffWrap<sup>®</sup> Installations used TuffWrap<sup>®</sup> EXT double-reinforced temporary engineered exterior walls, TuffWrap's signature exterior protection solution, to create a protected space for the production lines during the wall removal. It is a weather barrier that temporarily encloses the exterior of a structure without the need to shrink material with an open flame or scaffolding. TuffWrap EXT has an innovative scrim design that enables a custom fit to protect against weather and contamination.

#### INDUSTRY

Automotive

#### LOCATION

#### CLIENT(S)

Tire Manufacturer

#### SOLUTION

TuffWrap<sup>®</sup> EXT Engineered Exterior Walls

#### SIZE

600 linear feet

#### DURATION

## CONCLUSION

TuffWrap kept the Tire Manufacturing Facility operational during construction while protecting people and the facility from dust, debris and weather. The TuffWrap EXT temporary walls provided an effective barrier solution, keeping the Tire Manufacturing Facility's employees safe and production lines rolling during the expansion. It is a temporary wall solution durable enough to endure the daily vehicle traffic.

There's no stopping industrial construction, but TuffWrap is here to stop the dust and debris damage it can cause. TuffWrap® Installations innovative dust, debris, and construction containment solutions keep companies safe, clean, and operational during construction and repairs.
